1. One-Line Pitch

NightMap is a GPS-based social companionship platform for East Africa where verified adults find available company nearby — tonight — connecting instantly via Mobile Money, with privacy and safety built in for everyone.

---

2. The Problem

The founder personally experienced this traveling across Ugandan towns: wanting company for the evening with no safe, reliable, or discreet way to find it. The same frustration is shared by millions across East Africa every night.

Who feels this problem:

- Business travelers alone in hotel rooms in Mbarara, Kisumu, Dar es Salaam
- Men in any town wanting casual companionship without risk of bars or scam connectors
- Women who want to earn money for their time safely and on their own terms
- Professional women with day jobs who want to earn discreetly without being publicly visible
- Female seekers — women who want company too but have no safe platform
- Adults who tried Tinder but found it too slow, too sparse, or too foreign
- People who used local connectors and lost money or ended up in unsafe situations

Why existing solutions fail:

Solution	Why It Fails in East Africa
Tinder / Bumble	Low density outside capitals, slow matching, foreign UX, cards-only payments
Facebook / Instagram	Too public — EA social culture demands discretion
Bars & nightlife	Expensive, unsafe, unverified, time-consuming, hit or miss
Local connectors	Unregulated, scam-prone, dangerous, zero accountability
Escort directories	No verification, no safety layer, no Mobile Money, legally exposed
WhatsApp groups	Unverified, unstructured, unsafe, no payment protection

The gap: No verified, GPS-based, Mobile Money-powered, privacy-first companionship platform exists anywhere in East Africa.

---

3. The Solution

NightMap is a web-first Progressive Web App (PWA) — no app store download needed. Users open it in their browser, install it on their home screen, and it works like a native app.

The platform has two sides — seekers and companions — across three gender configurations:

- Male seekers + Female companions (primary market)
- Female seekers + Male companions (Ladies Mode)
- Any seeker + Ghost Companions (private/invisible companions)

Core flow for Male Seekers:

1. Open NightMap in browser — no download needed
2. See live GPS map of verified companions available near you right now
3. Filter by distance, price, rating, availability, category
4. Send connection request — pay via MTN MoMo, Airtel Money, or M-Pesa
5. Chat in-app once request accepted — voice notes supported
6. Receive matched Ghost Companion notification if subscribed to private pool
7. Meet at agreed public location — check-in activated
8. Rate experience after meetup

Core flow for Companions:

9. Register free — choose Public or Ghost mode
10. Verify identity — National ID + selfie + 5-second video
11. Set profile: photos, alias name, availability, rates, categories, preferred areas
12. Go live on map (Public) or activate private availability (Ghost)
13. Accept or decline connection requests / algorithm matches
14. Chat with seeker — use quick replies or voice notes
15. Activate safety check-in before every meetup
16. Receive Mobile Money payment after confirmed meetup

---

4. User Types — Six Distinct Profiles

User Type	Who They Are	How They Use NightMap	Privacy Level	Revenue Source
Male Seeker	Men seeking female company	Browse map, pay per connection	Standard	Connection fees,

				subscriptions, bundles
Female Seeker	Women seeking male company	Ladies Mode map, cheaper connections	High — hidden from male seekers	Connection fees (discounted)
Public Companion	Women openly listing availability	Live GPS pin, browsable profile	Town-level location only	Earns per meetup, platform takes 15%
Ghost Companion	Women earning privately, invisible	Algorithm matched, never on map	Maximum — completely invisible	Ghost subscription + match fees
Discreet Professional	Employed women earning on schedule	Available specific times only	Maximum + work-hours blackout	Discreet Professional subscription
Gentleman Companion	Men available for female seekers	Listed in Ladies Mode map	Standard	Earns per meetup, platform takes 15%

4.1 Ghost Companion — The Supply Unlock

Ghost Companions are NightMap's most powerful innovation. They are fully verified but completely invisible — never shown on the public map, never searchable by name or phone. They earn money on their own terms with zero public exposure.

Three ways Ghost Companions get connected:

Option A — Algorithm Match

Ghost Companion sets preferences: seeker age range, minimum rating, preferred days/times, location radius. When a matching seeker is nearby, she receives a private notification: 'Someone matching your preferences wants company tonight. Accept?'

Option B — Invite Only Pool

Seeker pays a premium to send a request into the private Ghost pool. He never sees who is in it. A Ghost Companion who matches his profile receives the invite and accepts or declines privately.

Option C — Referral Only

Ghost Companion only accepts seekers referred by previous seekers she rated highly. Completely word-of-mouth, completely private chain of trust.

4.2 Ladies Mode

A completely separate experience for female seekers. When a woman registers she chooses her mode. In Ladies Mode:

- Map shows Gentleman Companion pins only — male seekers cannot see she is browsing
- Enhanced privacy by default — her profile never visible to male seekers
- Female-only support team
- Cheaper connection fees — platform incentivizes female demand
- Gentleman companions undergo stricter verification including optional background check

---

5. The Core Experience — The Map

The map is the heart of NightMap. It is what makes this platform fundamentally different from every competitor. When a user opens the platform they see a live map of their area with:

- Anonymous location pins for available companions — blurred to 500m radius for privacy
- Color coded pins: Green = available now, Yellow = available tonight, Grey = offline
- Flashing pins = Tonight's Deal active (time-limited discounted rate)
- Crown pin = Spotlight companion (paid featured placement)
- Tap any pin: photo thumbnail, alias name, age, distance, rate, trust score, categories
- Real-time updates — companions go live and offline dynamically via Socket.io
- 'New in Town' badge on pins for first 48 hours
- 'Hot Streak' badge for companions active 7+ consecutive days
- Warning markers on unsafe locations — community reported
- Tonight's Weather overlay — suggests indoor/outdoor venues based on forecast
- Load shedding zones overlay (Uganda) — shows UMEME schedule by area
- 'Trending Tonight' sidebar — most viewed companions in your city right now
- 'NightMap Score' city leaderboard — most active city tonight

---

6. Full Feature List

6.1 Discovery & Browsing

- GPS-based live map with real-time companion pins
- Advanced filters: distance, price range, rating, availability, verified only, new profiles, category
- 'Who Viewed Me' — companions see viewer count free, exact profiles behind paywall
- 'Trending Tonight' — most viewed companions in city right now
- 'New in Town' badge — auto-applied for first 48 hours on platform or in new city

- Search by alias name or location area
- Favorites / Wishlist — save companions, get notified when they go live
- 'Available Again' push notification — alert when a previously connected companion goes online
- 'Last Seen' status — shows activity recency on all profiles
- Mood-based matching — seeker sets mood (adventurous, dinner, party, relaxing), algorithm filters
- Multilingual: English, Luganda, Swahili — auto-detects phone language

6.2 Profile Features

- Photo gallery — up to 8 photos
- Alias name — never real name shown publicly
- Age, location (town/district only), languages spoken
- Availability calendar — set available days and hours
- 'The Menu' — activity categories: Dinner Date, Nightclub, Movie Night, Pool/Swim, Massage, Conversation & Drinks, City Tour
- Hourly rate and minimum booking duration
- Trust Score — composite: ID verified, video verified, completed meetups, avg rating, response rate, account age
- Verified badge — shown after full ID + video verification
- 'Hot Streak' badge — 7+ consecutive active days
- Rating history — visible to seekers
- Bio — short personal description

6.3 Connection & Matching

- Standard connection request — seeker pays per request
- Super Request — highlighted priority request, companion sees it first
- Paid DM — send one message before committing to full connection fee
- Icebreaker questions — pre-written openers to reduce awkward first messages
- Algorithm match for Ghost Companions — automatic based on preferences
- Invite Only pool — premium seekers send blind invites to Ghost pool
- Referral chain — Ghost Companion accepts only referred seekers
- Couples Mode — two seekers connect with one companion as a pair
- 'Wingman' referral — invite a friend, both get bonus connections

6.4 Communication

- In-app chat — end-to-end encrypted
- Voice notes in chat — critical for EA market
- Tipping in chat — send Mobile Money tip before meetup
- 'Discreet Stories' — photos/videos disappear after 24 hours, screenshot detected

- Quick Response templates for companions — set pre-written replies
- Virtual phone number — NightMap-issued temporary number, real identity protected
- NightMap Radio — anonymous audio lounge by city (Kampala After Dark, Nairobi Nights)
- Live Streaming — 60-second live video from map pin, seekers tip via Mobile Money

6.5 Booking & Scheduling

- Instant booking — available now
- Scheduled booking — book for tonight or this weekend
- 'Night Pass' — city-specific 48-hour unlimited connections pass
- 'Tonight's Deal' — companion activates flash discount for 2 hours, flashing pin on map
- 'Spotlight' — companion pays for 1-hour featured pin at top of map
- Experiences Marketplace — bookable activities: dinner, city tour, pool party, sports
- Hotel Partnership — book partner hotels through NightMap, discounted rates, 10% commission
- 'Safe Ride' — book SafeBoda/Bolt home after meetup through app
- Discreet Gift Delivery — send flowers, wine, chocolates to companion's area anonymously

6.6 Privacy Features

- Ghost Mode browsing — browse map completely invisibly, pin disappears
- Ghost Companion mode — full invisibility, algorithm-matched only
- Discreet Professional tier — available specific hours only, no daytime notifications
- Notification disguise — push notifications appear as generic app name not NightMap
- Payment disguise — Mobile Money statement shows 'NM Services' not NightMap
- Virtual phone number — real number never shared
- Alias name system — real name never used on platform
- Location blur — GPS pin blurred to 500m radius
- 'Pause & Resume' subscription — pause up to 2 months without losing tier

6.7 Premium Tiers

- NightMap Black — invite-only, top 1% seekers, UGX 500,000/month, concierge + ghost access + all features
- NightMap Concierge — pay UGX 200,000 for human-arranged full evening package
- Corporate Account — company buys accounts for traveling employees
- Agency Account — group of 3-10 companions managed by one admin
- Verified Gentleman — male companions with stricter verification for Ladies Mode

6.8 Engagement & Retention

- Loyalty Points — every connection earns points, redeem for free connections and boosts

- Streaks — companion active 7 days in a row earns Hot Streak badge
- 'Chemistry Score' — post-meetup 5-dimension rating, algorithm learns preferences over time
- 'Morning After' rating reminder — gentle push 8 hours after connection
- 'NightMap Score' city leaderboard — city activity ranking updated daily
- Companion reputation carries across Ghost-to-Public upgrade
- Offline mode — browse saved profiles, queue messages, sync on reconnect

6.9 Unique Uganda/EA Features

- Power Cut Alert — UMEME load shedding schedule overlay on Kampala map
- 'Tonight's Weather' — weather overlay suggests indoor/outdoor venue options
- 3G optimised — compressed images, lite mode for slow connections
- Mobile Money first — MTN, Airtel, M-Pesa before any card option
- Swahili + Luganda language support
- 'Neighborhood Intel' — anonymous tips about good/unsafe locations
- 'Community Watch' — crowdsourced unsafe location warnings on map

---

7. Safety Framework

Safety is the product. Without it women will not join. Without women the platform has no value. Every safety feature is also a marketing feature.

7.1 Verification (Both Sides — Mandatory)

- National ID upload: Uganda NIRA, Kenya Huduma, Tanzania NIDA
- Phone OTP: MTN, Airtel, Safaricom
- Selfie photo match against ID photo
- 5-second video verification — say random 4-digit code on screen, proves real and current
- Verified badge shown on all profiles
- Unverified users cannot send or receive connection requests
- 'Vouched' system — existing users vouch for new users they know personally

7.2 Trust Score System

Composite score combining: ID verified, video verified, completed meetups, average rating, response rate, account age. Shown as single number (0-100). Seekers can filter by minimum trust score.

7.3 During Meetups

- Mandatory check-in: confirm location, time, companion identity before leaving
- Real-time location shared with one trusted contact during meetup
- 60-minute safety check — app pings 'Are you safe?' — no response triggers alert
- Panic button — sends GPS + alert to trusted contact AND NightMap safety team instantly
- Safe Word in chat — companion types hidden keyword, triggers automatic emergency response
- First meeting must be at a public place — home addresses blocked in chat
- Meetup Insurance — optional UGX 2,000 per meetup, refund if no-show or incident

7.4 Payment Safety

- Connection fee held in escrow — released after meetup confirmed by both parties
- No cash on platform — all transactions digital and traceable
- Companion paid via Mobile Money — direct, safe, documented
- Refund policy — full refund if companion cancels, partial if seeker cancels late

7.5 Community Safety

- Ratings both ways — seekers rate companions AND companions rate seekers
- Below 3.0 rating = account suspended pending review
- Companion blacklist — 3 flags from different companions = permanent ban
- 'Community Watch' — anonymous unsafe location reporting
- 24/7 WhatsApp safety support line
- Zero tolerance: violence, harassment, underage — immediate permanent ban + report to authorities
- Dedicated safety team reviews all flags within 2 hours

---

8. Market Opportunity

Country	Adult Population	Smartphone Users	Mobile Money	Launch Priority
Uganda	15M+	~5.25M (35%)	MTN MoMo, Airtel Money	Month 1 — Launch market
Kenya	25M+	~13.75M (55%)	M-Pesa, Airtel Money	Month 6 expansion
Tanzania	30M+	~12M (40%)	M-Pesa, Tigo, Airtel	Month 9 expansion
Total EA	70M+	~31M	All via Flutterwave	Full market Year 2

Primary target demographics:

- Male seekers: 25-55, employed, smartphone user, mobile money account, travels for work
- Female companions: 20-40, financially motivated, safety-conscious, smartphone user
- Female seekers: 30-55, professional, financially independent, values discretion
- Ghost companions: 22-45, employed in formal sector, wants income without public exposure

Key launch cities: Kampala, Wakiso, Entebbe, Mbarara, Gulu, Mbale, Jinja, Fort Portal, Arua

Phase 2 cities: Nairobi, Mombasa, Kisumu, Nakuru

Phase 3 cities: Dar es Salaam, Arusha, Mwanza, Dodoma

---

9. Business Model & Revenue Streams

Core principle: Free to join for everyone. Revenue generated at the moment of connection and through premium features.

9.1 Connection Fees (Primary Revenue)

Product	Description	UGX	KES	TZS
Single connection	One connection request	3,500	130	2,500
Bundle — 10 connections	Discounted pack	25,000	900	18,000
Bundle — 30 connections	Best value	60,000	2,200	45,000
Unlimited monthly	All connections 30 days	55,000	2,000	40,000
Super Request	Priority highlighted request	8,000	300	6,000
Paid DM	Single message before committing	2,000	75	1,500
Couples Mode connection	Two seekers, one companion	6,000	220	4,500
Night Pass (per city)	48-hour unlimited in one city	25,000	900	18,000

9.2 Companion Revenue (Platform takes 15% of all tips/live stream income)

Product	Description	Price	Platform Cut
Profile Boost	Featured pin 24 hours	UGX 10,000	100%
Spotlight	Top map pin for 1 hour	UGX 5,000/hr	100%
Tonight's Deal activation	Flash discount listing	UGX 3,000	100%
Live stream tips	Seekers tip during live	Variable	30%
In-chat tips	Pre-meetup tip via MoMo	Variable	15%
Ghost subscription	Invisible companion monthly fee	UGX 20,000/mo	100%
Discreet Professional tier	Ghost + time restrictions	UGX 30,000/mo	100%
Agency account	Group of 3-10 companions	UGX 100,000/mo	100%

9.3 Premium Seeker Subscriptions

Tier	Features	Price/Month
Ghost Mode	Browse map invisibly	UGX 15,000
Premium Filters	Advanced search filters	UGX 10,000
Chemistry Score	Full match analytics	UGX 10,000
Favorites Unlimited	Save unlimited companions	UGX 8,000
Virtual Phone Number	NightMap-issued number	UGX 5,000
NightMap Black	All features + concierge + ghost pool	UGX 500,000

9.4 Marketplace & Partnership Revenue

Stream	How It Works	Revenue Model
Hotel partnerships	Book partner hotels, discounted rates	10-15% commission per booking
Experiences marketplace	Book activities: dinner, tours, events	15% commission per booking
Safe Ride integration	Book boda/bolt after meetup	10% commission per ride
Discreet gift delivery	Send gifts to companion area	20% commission per delivery
Venue advertising	Bars/clubs feature events on map	UGX 50,000-200,000/event
Corporate accounts	Company buys employee accounts	UGX 2,000,000+/month
NightMap Concierge	Full evening arranged by human	UGX 200,000 per booking
Meetup Insurance	Optional per-meetup protection	UGX 2,000 per meetup

'Who Viewed Me' reveal	Pay to see exact profiles who viewed	UGX 3,000 per reveal
Invite Only pool access	Premium blind invite to ghost pool	UGX 15,000 per invite

10. Revenue Projections (Conservative)

Period	Active Seekers	Monthly Connections	Avg Fee	Est. Monthly Revenue
Month 3 (Kampala MVP)	500	2,000	UGX 5,000	UGX 10,000,000
Month 6 (Uganda)	3,000	15,000	UGX 5,500	UGX 82,500,000
Month 9 (Uganda+Kenya)	10,000	60,000	UGX 6,000	UGX 360,000,000
Month 12 (Full EA)	25,000	180,000	UGX 6,000	UGX 1,080,000,000
Year 2 (Scale)	100,000	800,000	UGX 6,500	UGX 5,200,000,000

Note: Projections include connection fees only. Premium subscriptions, marketplace commissions, advertising, and corporate accounts add significant additional revenue on top.

11. Competitive Advantage

Factor	NightMap	Tinder/Bumble	Local Fixers	Escort Dirs
GPS real-time map	Core feature	No	No	No
Ghost Companion mode	Unique — fully invisible	No	No	No
Ladies Mode	Full female seeker support	Partial	No	No
Video verification	5-second live video	None	None	None
Virtual phone number	NightMap-issued number	No	No	No
Mobile Money payments	MTN, Airtel, M-Pesa	Cards only	Cash	None

Safety check-in + panic	Built into every meetup	None	None	None
Escrow payments	Protected until confirmed	No	No	No
Live streaming + tips	Map-integrated	No	No	No
NightMap Radio	City audio lounges	No	No	No
Power Cut Alert	Uganda-specific	No	No	No
Offline mode	3G-optimised EA-specific	No	WhatsApp	No
Works on 3G	PWA optimised	Heavy app	WhatsApp	Website
EA-focused	Built for EA	Generic global	Local only	Partial

---

12. Legal Structure & Compliance

NightMap operates as an introduction and social companionship platform. Legal protection is built into every layer of the product:

Platform framing:

- NightMap facilitates introductions between adults for social companionship
- Platform is not responsible for private arrangements between consenting adults
- No language on platform references paid sexual services at any point
- Terms of Service explicitly define platform as introduction service only
- All users must confirm they are 18+ — enforced by ID verification

Legal registrations required:

- Uganda: Register as technology company under URSB before launch
- Kenya: Register Kenyan entity before Month 6 expansion — Companies Registry
- Tanzania: Register Tanzanian entity before Month 9 expansion — BRELA
- Data protection compliance: Uganda DPA 2019, Kenya DPA 2019, Tanzania Electronic Transactions Act
- Payment processing: Flutterwave — fully licensed in Uganda, Kenya, Tanzania

CRITICAL: Engage a lawyer in Uganda before writing a single line of code. Platform Terms of Service, Privacy Policy, and product description must be legally reviewed before any launch.

13. Technical Architecture

Built entirely on existing infrastructure — zero new hosting costs at launch:

Layer	Technology	Notes
Backend	Node.js + TypeScript + Prisma	Existing stack — new NightMap database
Frontend	Next.js PWA	Installable from browser, no app store needed
Database	PostgreSQL	Add nightmap schema to existing server
Real-time	Redis + Socket.io	Live map updates, online status, chat, radio
Maps	Mapbox GL JS	Better Africa coverage, cheaper than Google Maps
Payments	Flutterwave	MTN, Airtel, M-Pesa — one integration covers all EA
SMS / OTP	Africa's Talking	Uganda, Kenya, Tanzania — already integrated
Video verification	WebRTC in-browser	Record 5-second clip during signup
Live streaming	WebRTC + HLS	60-second map-integrated live video
Audio rooms (Radio)	WebRTC audio / Agora.io	City-based anonymous voice rooms
Virtual numbers	Africa's Talking Virtual Numbers	East Africa coverage
Media storage	Cloudinary	Profile photos, optimised delivery, blurring
Hosting	Existing VPS 212.47.69.106	New PM2 processes: nightmap-api + nightmap-web
Domain	nightmap.africa	Register immediately

New PM2 processes to add to existing server:

- nightmap-api — Node.js/TypeScript backend on port 4500
- nightmap-web — Next.js PWA frontend on port 5500
- Add Nginx server block for nightmap.africa domain
- Add nightmap database to existing PostgreSQL instance

14. Cold Start Strategy

The two-sided marketplace problem: no companions = no seekers, no seekers = no companions. Solved by supply-first strategy:

Phase 1 — Build Supply Before Demand (Month 1)

- Recruit 50 Ghost Companions first — lowest barrier to entry, no public exposure
- Recruit 50 Public Companions in Kampala via trusted personal network
- Offer: free Ghost subscription for 6 months to first 100 companions
- Guarantee: if companion gets zero connections in first month, NightMap pays UGX 50,000 compensation
- Create private WhatsApp community for companions — build trust before platform launches
- Video verify all 100 companions before opening to seekers

Phase 2 — Controlled Seeker Launch (Month 2)

- Invite-only for first 200 seekers — personal network only
- First 5 connections free for early seekers
- Aggressive feedback collection — fix everything before public launch
- Companion feedback loop — what are seekers asking for that we don't have yet

Phase 3 — Public Kampala Launch (Month 3)

- Open registration to all users in Kampala
- TikTok content strategy — curiosity-driven, never explicit
- WhatsApp broadcast to personal networks in Kampala
- 'Wingman' referral program activated — seekers invite seekers
- Word of mouth is primary growth driver for companion recruitment

---

15. Development Roadmap

Phase	Timeline	Key Deliverables
Phase 0 — Foundation	Now	Lawyer consultation, domain registration (nightmap.africa), business registration URSB, wireframes, companion recruitment begins
Phase 1 — Core MVP	Month 1-2	Registration + verification, GPS map, profiles, connection requests, Mobile Money, in-app chat, voice notes, basic safety check-in

Phase 2 — Ghost + Privacy	Month 2-3	Ghost Companion mode, Ladies Mode, Discreet Professional tier, virtual phone numbers, panic button, escrow payments, trust score
Phase 3 — Engagement	Month 3-4	Live streaming, tipping, NightMap Radio, Tonight's Deal, Spotlight, loyalty points, streaks, mood matching
Phase 4 — Marketplace	Month 4-5	Hotel partnerships, Experiences marketplace, Safe Ride, gift delivery, NightMap Black, Concierge
Phase 5 — Uganda Full	Month 5-6	Mbarara, Gulu, Mbale, Jinja, Fort Portal, Power Cut Alert, load shedding overlay
Phase 6 — Kenya	Month 6-8	Nairobi launch, M-Pesa direct integration, Kenyan entity registration, Swahili UI
Phase 7 — Tanzania	Month 9-12	Dar es Salaam, Arusha, Tanzania entity, full Swahili support
Phase 8 — Mobile App	Year 2	Android PWA upgrade to native app, framed as social/lifestyle on Play Store
Phase 9 — Scale	Year 2+	Series A fundraising, Rwanda, Ethiopia, Nigeria expansion

16. Risks & Mitigation

Risk	Level	Mitigation
Legal action in Uganda/Kenya/Tanzania	High	Lawyer review before launch, introduction-only platform framing, careful Terms of Service
Underage users	High	Mandatory ID + video verification, zero tolerance, immediate ban + report to authorities
Safety incidents during meetups	High	Check-in system, panic button, safe word, public venue requirement, 24/7 safety team
Low companion supply at launch	High	Supply-first strategy, Ghost mode removes public exposure barrier, compensation guarantee
Ghost Companion abuse (fake accepts)	Medium	Escrow only releases after both confirm, rating system, 3-strike ban
Payment fraud	Medium	Flutterwave escrow, verified phone numbers, transaction limits, refund policy
Reputation / PR risk	Medium	Discreet branding, no explicit platform language, introduction service framing
Server capacity under load	Medium	Scale VPS or move to cloud (AWS/DigitalOcean) when user base hits 10,000
Companion safety incidents	High	Panic button, check-in, trusted contact system, insurance, safety team response SLA 15min

Competition from Tinder/Bumble	Low	They don't serve this use case in EA — different product entirely
App Store rejection	Low	Web-first PWA avoids App Store entirely at launch

---

17. Immediate Next Steps

Before writing a single line of code — complete these first:

17. Consult a lawyer in Uganda this week — legal structure is everything
18. Register domain: nightmap.africa (or nightmap.ug as backup)
19. Register NightMap as a business name with URSB Uganda
20. Design wireframes for 5 core screens: map view, profile, connection flow, Ghost signup, safety check-in
21. Recruit first 10 Ghost Companion beta testers via trusted personal network — start building supply now
22. Open a separate Flutterwave account for NightMap — keep completely separate from PleasureZone
23. COMPLETE PLEASUREZONE FIRST — fix mobile money checkout, launch affiliate system, get to UGX 5M/month — use that cash flow to fund NightMap build
24. Set up nightmap-api (port 4500) and nightmap-web (port 5500) on existing VPS
25. Add nightmap.africa Nginx server block to existing configuration
26. Estimated MVP build time: 8-10 weeks working evenings and weekends

Estimated launch budget:

- Lawyer consultation: UGX 500,000 - 1,000,000
- Business registration + domain: UGX 300,000
- Initial marketing (companion recruitment): UGX 500,000
- Mapbox API credits: ~$50/month
- Agora.io (Radio feature): ~$30/month
- Total estimated launch cost: UGX 2,000,000 - 3,000,000 (~$800)

This document represents a complete product brainstorm session conducted on 15 May 2026.

Review carefully. Consult a lawyer before building. Complete PleasureZone before starting.
